Source of Truth

This data validation report serves as a source of truth with the results of key metrics and calculations done at the data source in SQL.

Key Business Definitions:

Churn Status - Calculated at the churn event date
Active Accounts - Accounts with no churn event recorded
MRR - Total MRR from active subscriptions
ARR - Total ARR from active subscriptions
Estimated Churned MRR - Total MRR from churned subscriptions
Estimated Churned ARR - Total ARR from churned subscriptions
Risk Level - Risk levels are derivded from feature usage within the first 30 days after sign-up, number of high priority tickets filed with support and high overall support ticket numbers signifying high support needs

KPIS

Total Accounts

```
SELECT
        COUNT(account_id) AS Total_Accounts
FROM vw_customer_360_account
```
